Seven Seas Sevens Tournament

by RICHARD TINGLE, Hull Daily Mail

After a tough, long and gruelling season it comes as a relief to relax and what better way to bring down the curtain than with a sevens competition.

Sevens, although competitive, provide players with the rare opportunity to let their hair down and enjoy themselves.

The pressures and demands are lifted, players can settle down and play with a somewhat care-free approach.

In general this kind of attitude provides the sort of entertainment the fans relish and in general they are treated to some spectacular stuff.

Players revel in the wide open spaces and sevens are undoubtedly for the quick and pacey players, who have the opportunity to exploit their speed.

Last season Sevens Seas introduced a sevens competition to end the campaign and it proved a highly successful venture.

The tournament produced plenty of points, exciting and many memorable moments to round off the season.

The success of that tournament prompted Seven Seas to run it again this year, and looking through the eight sides involved it again promises to be an entertaining afternoon.

The eight teams involved are all very capable sides and on the evidence of their teams they are all serious and looking to win.

The draw of course, could not have been better as it produced a repeat of the Challenge Cup Final between Hull and Featherstone.

It gives Hull a chance of revenge, although I am sure they would have rather won at Wembley.

Hull will also be looking to do well because they are the hosts.

Last season they reached the final and after an exciting clash with neighbours Kingston Rovers went down in a sudden death play-off.

First they must beat Featherstone, and Alan Agar is certainly not expecting a quick exit and has named six of his Wembley squad.

Holders Rovers, will be keen to retain the trophy and have named a squad which has a pacey look about it.

They have tried to blend experience with youth and after being somewhat overshadowed by their neighbours again this season I am certain a win at the Boulevard would go down extremely well.

St. Helens though, are likely to provide a tough opening match, because Saints too have plenty of ability amongst their ranks.

Saints, who have been rebuilding, were on the fringe of breaking through this season.

280039

The biggest disappointment was that shock Cup defeat against Featherstone, but they shook that off and remained on the outside of the title contenders.

Undoubtedly they are a team to watch out for in the future.

Bradford, under Peter Fox, never give anything away, and despite a disappointing League campaign they have come close to honours this season.

They were beaten finalists in the Yorkshire Cup, losing to Hull, and they reached the semi-final of the Challenge Cup.

Just two or three wins and they would now have a couple of trophies on the sideboard at Odsal Stadium.

Coming to the Boulevard has always been a pleasure of Mr. Fox. He likes nothing better than winning at the Boulevard, and Northern will certainly be looking to do well in this tournament.

They too have named a useful looking side and their clash with Oldham has more than an interesting look about it.

Oldham, under the guidance of Great Britain coach Frank Myler, have had a magnificent return season in the First Division.

In many respects they have been the surprise side in the division and did extremely well to finish in fourth place.

Oldham too, are building for the future and have an excellent youth policy and a string of talented youngsters coming up.

And, apart from club pride Mr. Fox will surely get a little bit of satisfaction from a Bradford win over British coach Myler's Oldham side.

The final clash is between Widnes and Castleford and here we have two sides who are more than capable of going on and winning the competition.

Castleford, a fast and flowing attacking side normally, have to be a threat in tournaments such as this.

They have the skill and pace to exploit the extra room sevens provides, but they will be put to the test by Widnes.

The Chemics look more than useful and could well turn out to be the dark horses of the competition.

By Widnes' standards this has been something of a disastrous season, although most sides would have been happy with similar performances.

Yet they have been near, and that is good going when you consider that they are going through something of a transitional period.

In players like Andy Gregory, Tony Myler, David Bassnett, Joe Lydon and Ralph Linton, along with David Hulme, they are a promising batch of men to build their future on.

This clash could well turn out to be the tie of the series, and whoever wins must fancy their chances of that £750 first prize.

With some £3,500 in prize money at stake this is undoubtedly a worthwhile competition and it provides that little bit extra incentive.

The Squads

BRADFORD N.

Dick Jasiewicz
Brian Noble
Chris Parrott
Dean Carroll
Ellery Hanley
Phil Jackson
Keith Whiteman
David Smith
Gary Hale

OLDHAM

Mick Parrish
Ray Ashton

yourself.*

WITH
HEALTH SUPPLEMENTS
FROM

SEVEN SEAS

SEVEN SEAS SUPPLEMENTS

naturally conducive to good health

To keep you feeling up to par, vitamins and minerals are essential. Obviously, a balanced diet will provide all that's needed, but too often today people rely on hurried, ill-prepared meals with too many processed foods. The result is that they risk not getting enough vitamins and minerals. And also at risk are convalescents, the elderly, 'faddy' eaters, people dieting incorrectly, sports addicts, women on the 'pill' or around the menopause. Those with a high consumption of alcohol also risk a similar deficiency.

This being the case, Seven Seas Supplements may be of considerable help to you. They are a unique range of the highest quality that are generally available from chemists.

By taking whichever supplement you think is right for your way of life, you are helping to take the very best care of yourself.

Super Vitamin B₆ Capsules A high potency formula providing 50mg of vitamin B₆ (chemical name Pyridoxine) in each easy to swallow small gelatin capsule.

B₆ is an important vitamin which is essential for the health of the nervous system. It is also a necessary agent in the metabolic control of energy and the production of certain hormones. Since Vitamin B₆ cannot be stored in the body or taken in excess, regular supply is essential.

Many women prefer to take extra Vitamin B₆ prior to and during their periods, the dosage can be safely increased at this time. This regime may also be followed, without risk, by users of the contraceptive pill, who may have an increased requirement for this vitamin.

Each tub contains 60 x 50mg **Seven Seas Super B₆ Capsules**.

'Vitamin C-Plus' Capsules Provides 200 mg of Vitamin C together with natural bioflavonoids and blackcurrant concentrate. Each easy to swallow capsule supplies the Vitamin C equivalent to 100g of fresh blackcurrants or 4-6 oranges. Vitamin C supplements are most popular in the cold season of Winter, when natural food sources are scarce. Colds and 'flu tend to deplete the body's Vitamin C, as does smoking, and since body stores are limited, regular intake is desirable. Vitamin C helps to promote the absorption of iron from food, and is essential for healthy teeth, gums, bones, blood vessels and maintenance of good health.

Each tub contains 60 **Seven Seas 'Vitamin C-Plus' Capsules**

TOWARDS COMPLETE NUTRITION

FOR YOUR GOOD HEALTH

Nutritional understanding has been growing apace in the Western World in the last 50 years. But we still have much to learn from folklore in the use of traditional natural foods which have survived for thousands of years and whose beneficial effects are only now beginning to be explained.

This is particularly so with plants from the East where ginseng for example has been highly valued for over 5,000 years. Yet only recently has it received any attention in the West, where it is becoming increasingly acclaimed.

Good health is of course based on complete nutrition and in past centuries man was kept healthy when he consumed a varied diet

which included natural whole foods and fresh vegetables and plenty of fruit.

Sadly today, convenience foods too often replace these rich sources of vitamins and minerals which modern science has shown we need, for seldom do highly processed convenience foods provide as much of these vital nutrients.

At Seven Seas, we believe that our range of health supplements will provide you with vitamin and mineral insurance, whatever your way of life. It is our firm contention that by using Seven Seas Supplements intelligently as and when you feel you need them, you are doing a great deal towards ensuring the complete nutrition on which your good health depends.

'Bran Extra' is no ordinary wheatbran, it is finely milled but gently processed under a unique system which retains the Bran's natural wheatgerm content, making it more palatable and wholesome. Bran, the richest natural source of dietary fibre is a most popular food supplement, which is often recommended by the medical profession nowadays.

It is recommended for adding extra roughage or fibre to your diet which will help maintain regularity and generally aid digestion. More recently, Bran and fibrous foods in general have been popular aids for those on calorie controlled diets. Regular dietary intake of Bran can help suppress the appetite, absorb water and speed the elimination of waste.

Seven Seas 'Bran Extra' is a pleasant and positive contribution to good health, available in 500g sealed bags.

Stabilised Wheatgerm is a natural source of essential B vitamins, Vitamin E, iron, protein and dietary fibre, which at one time was regularly supplied by our diets in our daily wholemeal bread. Nowadays, white bread is a more popular consumer choice and this is produced from flour which is wheatgerm deficient. Other sources of wheatgerm's nutrients may also be absent from our diet, which because of our modern way of life generally contains too many processed and convenience foods.

Regular intake of Seven Seas Wheatgerm may therefore provide a counter balance to this trend. Its rich, nutty flavour makes it a pleasant and healthy addition to your breakfast cereal, soups, stews, cakes and pastries.

Seven Seas Stabilised Wheatgerm is available in two sizes, 250g or 500g, sealed in plastic bags and cartoned to ensure freshness.

SEVEN SEAS

HEALTH FROM THE SEA

The sea is the mother of life on our planet. Life began in the sea and most of the world's plants and animals live there. As our world evolved over millions of years, life moved from the sea to the land where man as we know him today gradually developed to dominate the planet.

Even though our ancestors left the sea years ago, it appears that we cannot ignore our origins. There now is evidence that the sea provides us with important nutrients which are not readily obtainable from non-marine sources.

In the last century, fish was considered a cheap source of protein, eaten largely by the poorer members of the community, but as cheaper meats became available, dietary habits have changed. For example, in England as little as 100 years ago we ate at least 5-6 times as much fish as we do now — oily fish such as herring, mackerel and kippers being quite common foods.

The value of fish oil was recognised some 300 years earlier when Cod Liver Oil was used in hospitals for the treatment of many problems. It was a basic medicine highly prized for its many benefits. The exact reasons for its action were not fully understood at the time and even now we are still learning. During the 1930's-50's, Cod Liver Oil was provided by the Government through the N.H.S. as a Vitamin A and D supplement to ensure healthy growth and bone formation in children. Nowadays, Cod Liver Oil is still the subject of extensive research which is showing it to be far from 'old fashioned'; in fact, it is probably more relevant to our way of life now, than ever before. This continual research and development programme has led to the provision of more palatable Cod Liver Oil products such as Capsules, Cherry Flavour and Orange Syrup and Cod Liver Oil. Further, and more recent investigations have led to exciting new developments such as MaxEPA — a special concentrate of vitamin reduced fish oil providing EPA and DHA — two important active ingredients found in Cod Liver Oil. As these stories unfold, so renewed public interest in Cod Liver Oil grows and more people decide to 'Take Good Care of themselves' with Seven Seas.

As it was said to 'Build Health Naturally' for those of the past, so Seven Seas provides 'Health from the Sea' for the more health conscious people of today, and the generations of tomorrow.

Seven Seas MaxEPA

Our ancestors ate lots of oily fish whilst today only isolated groups consume such diets, e.g. the Eskimos and the Japanese. Despite high intakes of fat and cholesterol, Eskimos have enviable health records in many respects. The fatty acids EPA and DHA are thought to be responsible.

Oily fish is the only common source of EPA and DHA. MaxEPA provides these unique fatty acids in standardised form. EPA is a vital component of blood and is converted in the body to hormone-like substances called prostaglandins. DHA is an important component in the health of brain, nerves, heart and eyes.

In the maintenance of good health through the prime of life, factors such as overweight, smoking, lack of exercise and heredity are important, but dietary factors can also be involved.

The omega-3 fatty acids, EPA and DHA are found only at relatively low levels in western diets. It is thought that an increased dietary supply of these factors may be important in the maintenance of good health.

Seven Seas Cod Liver Oil Capsules Each golden Seven Seas Capsule contains 0.3ml of Cod Liver Oil fortified with extra vitamins A, D and E. No other vitamin supplement supplies this unique natural combination of health promoting properties. They are an excellent aid to natural good health providing many of the benefits of traditional Cod Liver Oil. Taken as directed, Seven Seas Capsules can help maintain the condition of your hair, skin and nails. Pack sizes are available to suit all budgets and the new 'healthitub' presentation makes them ideal to carry with you at all times. Seven Seas Capsules offer you the goodness of Cod Liver Oil in a modern easy to swallow form so that you no longer taste the good it is doing you, but just feel it.

Seven Seas Traditional & Cherry Flavour Cod Liver Oil

Seven seas provides the world's most popular and finest quality Cod Liver Oil. It is rich in vitamins A and D and also contains Vitamin E. For generations it has been highly prized for its natural vitamins, but nowadays it has come under great scrutiny for its unique fatty acid composition. It has proved to be a rich natural source of polyunsaturates, notably EPA and DHA. Cod Liver Oil helps maintain good growth, strong bones, sound teeth and healthy hair, skin and nails. It may also help ease the general aches and pains associated with growing older.

Available in Traditional or Cherry Flavoured form, this golden health aid is becoming more relevant to today's way of life than ever before.

Seven Seas Orange Syrup and Cod Liver Oil Seven Seas Orange Syrup combines all the natural goodness of Cod Liver Oil with the added benefits of Vitamins C, E and B6 blended in an orange juice base. As well as the typical benefits you would expect from Cod Liver Oil, Orange Syrup will also help maintain a healthy body through the winter and at other times when fresh food sources of Vitamin C are less readily available to our diet. Illness in general, and particularly colds and flu have been shown to deplete the body's vitamin C levels. Orange Syrup and Cod Liver Oil offers a convenient way of restoring the balance essential for the maintenance of good health. This pleasant tasting alternative to traditional Cod Liver Oil is available in two sizes, 150ml. and 300ml. bottles. This product is becoming an increasingly popular choice amongst all age groups.

SEVEN SEAS

Seven Seas Health Care Ltd, Marfleet, Hull HU9 5NJ.

Seven Seas Capsules contain only natural colouring and are free from added sugar, starch, lactose and preservatives.

Wheat Germ Oil Capsules Our forefathers ate large amounts of wholemeal bread, a natural source of wheat germ oil. But white bread is deficient in this substance, and, therefore, our diet today may be lacking. Seven Seas Wheat Germ Oil capsules contain the finest 'cold pressed' wheat germ oil—a rich source of Vitamin E and polyunsaturates, particularly the essential fatty acids (linoleic and linolenic acids), not naturally available in white bread. These substances are essential for normal healthy growth, and as they cannot be made by our bodies, must be supplied from our diets. Hence the great value of Seven Seas Wheat Germ Oil to your family.

Each tub contains 90 **Seven Seas Wheat Germ Oil Capsules**

Vitamin B Complex, Extra B₆ and Brewers Yeast Capsules

'B' Vitamins and their associated nutrients play key roles in the body's vital metabolism, helping to maintain the health of the nervous system, digestion and skin. Certain groups of people such as the chronically ill, the elderly, oral contraceptive users, children eating lots of sweets and snack foods and anyone who does not eat a regular balanced diet are at risk of a 'B' vitamin deficiency. These vitamins are not stored in the body, so daily intake is essential. Taken regularly this balanced Seven Seas formula containing Brewers Yeast, Liver Extract plus other valuable nutrients will help maintain adequate levels of 'B' vitamins in the body.

Each tub contains 60 **Seven Seas B Complex Capsules**

'Cider+3' Diet Aid Capsules This Seven Seas dietary aid will help ensure you receive significant amounts of certain vitamins, minerals and nutrients, which may become deficient whilst dieting. Cider Vinegar comes from apples and contains potassium. Lecithin is derived from the soya bean and is a natural emulsifier. Kelp is a form of seaweed, a source of many micro-nutrients including iodine. In addition, our formula contains wheat germ oil—a natural source of Vitamin E—and Vitamin B₆—a substance available in foods such as bread and beer, rice, beans and peas, and therefore, one which may be deficient if these foods are removed from your dieting programme. These capsules are specially formulated to be taken as a supplement to a weight reducing or calorie controlled diet which may sometimes be inadequately balanced. Suggested diet sheets may be obtained from our Nutrition Department at the address on this leaflet.

Each tub contains 60 **Seven Seas 'Cider +3' Capsules**

Super Vitamin E Capsules Recently there has been an increasing emphasis on the important role of polyunsaturated fats, such as corn and vegetable oils, in the diet. However, the use of these fats appears to place a greater burden on the body's Vitamin 'E' reserves. Consequently, if the consumption of polyunsaturates is increased, a larger intake of this vitamin may be needed. Polyunsaturates, including the essential fatty acids (so called Vitamins F₁ and F₂) and some vital nutrients such as Vitamin A can be destroyed by oxygen when exposed to air. It is thought that Vitamin E helps to prevent this loss of potency. These Seven Seas Super E capsules will help ensure that you receive an adequate intake of this essential protection.

Each tub contains 90 x 200mg **Seven Seas Super Vitamin E Capsules**

Cholesterol-free Lecithin Capsules Contain 200mg of natural soya lecithin in a polyunsaturated oil base. This convenient, easy to take form of lecithin is a rich source of the phospholipids, which contain the B Vitamins choline and inositol. These are essential for the breakdown and transport of fats within the body.

Unlike lecithin from egg yolk, which contains cholesterol, these Seven Seas Lecithin capsules are of vegetable origin and hence are cholesterol free.

They are ideally suited to protect your good health throughout your life.

Each tub contains 90 x 200mg **Seven Seas Cholesterol-free Lecithin Capsules**.

Garlic Oil Perles Garlic has long been recognised as the most potent member of the onion family, and as such has been considered a 'health food' for centuries. Today, research is providing scientific evidence to support this ancient idea. Of course, the use of garlic in cooking has the drawback of leaving a socially unacceptable breath odour. In spite of this, many people enjoy the taste it imparts to food and are convinced of its general health benefits. Each Seven Seas Garlic Perle provides 200mcg of pure garlic oil in an easy to swallow 'taste free' form. There is therefore little risk of breath odour interfering with your enjoyment of the same health benefits as people living in the Mediterranean area—where garlic is part of the every day diet.

Each tub contains 90 **Seven Seas Garlic Oil Perles**

Multivitamin and Minerals with Ginseng Extract Capsules

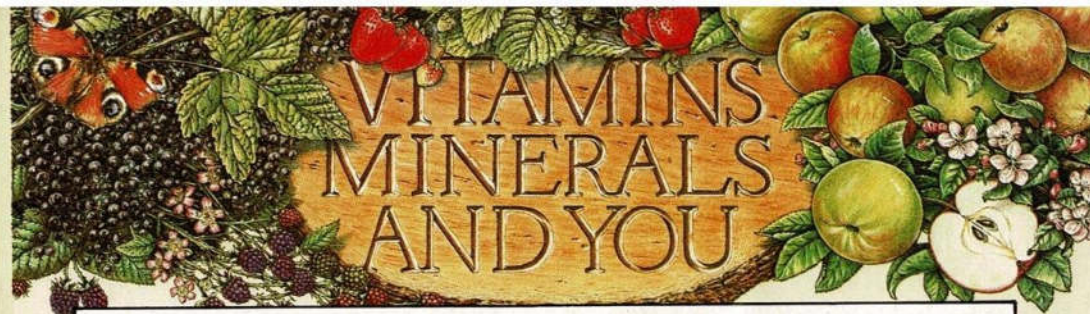

These Seven Seas capsules contain many important minerals and vitamins which may be lacking if your diet is in any way inadequate. Also included are additional natural nutrients such as cod liver oil, wheat germ oil, safflower oil, kelp, lecithin, rutin and the equivalent of 250 mg of Ginseng root powder per 2 capsules. Our unique formulation probably contains more constituents than any other formulation available today. Its many active ingredients taken as a regular food supplement will provide you with an exceptional form of nutritional insurance. One or two capsules daily according to need is a simple way to obtain this protection.

Each tub contains 60 **Seven Seas Multivitamin and Minerals with Ginseng Extract Capsules**

Korean Ginseng Capsules Seven Seas Korean Ginseng, is made from genuine fine quality six year old Ginseng root protected in pleasantly flavoured, easy to take oval capsules. It has been used in Chinese nutrition for over 5,000 years. Researchers are now investigating the beneficial properties of Ginseng. This research is revealing the secrets of this intriguing Oriental root which has been used in recent years as a supplement to the diet of the successful Olympic athletic teams. Analysis has brought to light the fact that Ginseng root contains useful organic acids, minerals, enzymes and vitamins. It has been found to be a food supplement beneficial not only for those leading active demanding lives but also for the elderly. Discover the root of the Orient for yourself.

Each tub contains 50 x 250mg **Seven Seas Korean Ginseng Capsules**

Vitamin	What it does
A Retinol	Important for normal growth in children. Necessary for good vision. Essential for healthy skin, eyes and hair and, in general, for the health of all the epithelial structures of the body.
B₁ Thiamine	Necessary for proper function of heart, nervous system and muscles. Essential for growth and required in order to obtain energy from food.
B₂ Riboflavin	Necessary for healthy skin. Concerned with the sensitivity of the eyes to light. Essential for building and maintaining body tissues.
B₃ Niacin, Nicotinic Acid, Nicotinamide	Necessary for converting food to energy. Aids the nervous system. Needed for maintenance of appetite and a healthy skin.
B₅ Pantothenic Acid	Required for the health of skin and hair. Essential for the growth of all tissues.
B₆ Pyridoxine, Pyridoxamine, and Pyridoxal	Important for healthy teeth and gums, the health of the blood vessels, the red blood cells and the nervous system. Necessary for converting food to energy.
B₁₂ Cyanocobalamin	Essential for healthy blood formation. Contributes to the health of the nervous system and proper growth in children.
Folic Acid	In conjunction with B ₁₂ it is essential for healthy blood formation, and for the integrity of the intestinal tract (digestive system).
Choline	Essential for the correct functioning of the liver, particularly with regard to fat metabolism.
Inositol	Works in conjunction with Choline, is essential for the correct functioning of the liver and metabolism of fat.
Biotin	Necessary for the integrity of skin and mucous membranes and for the health of red blood cells and cardiovascular system.
C Ascorbic Acid	Essential for healthy teeth, gums and bones. Builds strong body cells and blood vessels.
D (including D ₂ and D ₃) Calciferol	Necessary for strong teeth and bones. Helps in the utilisation of calcium and phosphorus to form healthy bones and teeth.
E Tocopherols	Acts as an anti-peroxidant of polyunsaturates in tissue fats. Essential for the integrity of red blood cells. Protects other nutrients such as Vitamin A.
K Phytomenadione	Necessary for normal blood clotting.
P Bioflavonoids	Necessary for healthy blood vessels and capillaries. Works with Vitamin C
Mineral	What it does
Magnesium	Assists in making proteins and keeps muscles in tune.
Zinc	Necessary for growth and the maturity of reproductive organs. Helps maintain healthy skin and is thought to help taste and flavour perception.
Iodine	It is vital to metabolism. It contributes to the hormone thyroxine, which chiefly regulates metabolic energy.
Iron	Necessary for keeping your blood healthy. It forms part of the red pigment of blood which carries oxygen from your lungs to every part of the body, and takes the waste product, carbon dioxide, back to the lungs.
Calcium and Phosphorus	Build strong bones and teeth, so they are particularly important to expectant mothers and babies and children. These nutrients need the help of Vitamin D to be effective.
Sodium and Potassium	Go hand in hand to work on body cells, and in balanced proportions they maintain nerve signals and muscle contractions. They also help the acid balance of body fluids.
Other trace elements	Are active ingredients in body salts, blood and organs, which the body requires in very small quantities.

Seven Seas Health Care Limited

SEVEN SEAS HEALTH CARE LIMITED, makers of the world's most popular brand of Cod Liver Oil products and the premier range of vitamin health supplements in the U.K. are once again pleased to sponsor Rugby League's most prestigious 'Sevens' tournament at the Boulevard, Hull.

The large crowd who attended last year's event will know what an exciting spectacle this competition provides. With so many leading sides taking part, and all of them keen to lift the Trophy, this year's tournament will provide even more compelling entertainment.

The present holders, Hull Kingston Rovers, will need to show the same kind of determined, fast play if they are to retain this increasingly competitive award.

The draw has again kept the Hull sides apart, and has thrown up some intriguing first round matches, the most amazing being Hull F.C. v Featherstone. This re-run of the Wembley Cup Final is sure to be the match of the round.

Seven Seas 'Sevens' provides the unique opportunity to view fast entertaining Rugby League Knock Out Cup matches of the highest standard.

At the end of seven thrilling matches, we will know this year's Seven Seas Sevens Trophy holder.

Seven Seas wish all the teams taking part the very best of luck and promise both players and spectators a most enjoyable afternoon's rugby.

To the Ball Boys at the Boulevard

Players and Officials of the Hull Football Club would like to express their appreciation to the Ball Boys for their dedication in executing their duties during the past season.

Today's Match Appeal

Ken Loxton, who in the past has given great service to clubs such as Keighley, Huddersfield and Halifax, was playing for Bramley at Cardiff when he suffered a serious spinal injury.

At present Ken is in hospital in Wales but obviously wishes to be nearer his family. Due to the severity of Ken's injury he cannot travel by road and must be flown home, the total cost of this transport is in excess of £900.

We would therefore ask you to contribute generously and trust you will join the club in wishing Ken a safe and speedy recovery.

Let's show the world that Rugby League supporters apart from being the best behaved are also the most caring.
